

COVID-19 and Infection Control: Good Ventilation & Air Handling as a Part of Infection Control (May 13, 2021)

Category: Policy Blog
written by NCUIH | May 13, 2021

May 13, 2021 | 2:30-3:30 p.m. EST

Next in the “COVID-19 and Infection Control” series is the seventh session, which will discuss the importance of “Good Ventilation & Air Handling as a Part of Infection Control.”

Presenters:

1. Rochelle Moore, LMHC (Urban Indian Center of Salt Lake)
2. Karen Kwok, MSN, FNP-BC, MPH (NCUIH)
3. Dr. Abigail Carlson, (Centers for Disease Control and Prevention)

Objectives:

1. Identify and review the techniques and requirements for proper ventilation and air handling procedures
2. Encourage engagement around proper ventilation and air handling within a clinical setting as part of infection control
3. Demonstrate an understanding and recognize the importance of ventilation and air handling in a clinical setting during the COVID-19 pandemic.
