

ADVANCE APPROPRIATIONS FOR THE INDIAN HEALTH SERVICE

What is Advance Appropriations?

[Advance appropriations](#) is funding that becomes available one year or more after the year for which the appropriations act is passed. Advance appropriations will stabilize Indian Health Service (IHS) funding and allow for long-term planning by insulating Indian health care providers from government shutdowns and continuing resolutions.

Why is it needed?

Lapses in federal funding puts lives at risk. During the 2019 government shutdown, several Urban Indian Organizations (UIOs) had to reduce services or close their doors entirely, forcing them to leave their patients without adequate care. One UIO suffered 7 opioid overdoses, 5 of which were fatal. Advance appropriations is critical to provide certainty to the IHS system and ensure unrelated budget disagreements do not risk lives.
